## THE ART OF MARTINIS

---

The debate over the origins of the Martini will rage as long as there are bars. Many claim that a bartender called Martini from Arma di Taggia, mixed the first Martini in the late 19<sup>th</sup> century at New York's Knickerbocker Hotel. It became an American icon in the twenties and the favourite drink of such luminaries as F. D. Roosevelt, W. Churchill, J. London, and E. Hemingway.

### DRY MARTINI COCKTAIL

A chilled glass; the purest gin or vodka; a touch of vermouth vigorously stirred.

The only addition is an olive or a lemon twist. Today a Martini is almost wholly made up of gin or vodka, so your choice of brand is vital.

### MARTINI VARIANTS

- **Dirty** made with a dash of olive brine
- **Dickens** without an olive or a twist
- **Gibson** with two cocktail onions
- **Bradford** shaken with orange bitters
- **Franklin** served with two olives
- **Wet** heavy on the vermouth
- **Churchill** stirred, with an unopened bottle of vermouth waved above the glass

## RUM, RHUM, RON

---

Is one of the world's oldest spirits, often misunderstood, steeped in tradition and with a colourful though not always honourable past.

During prohibition, citizens knocked back liquor that had been shipped in by "rum-runners", who picked up cased goods from the West Indies and shipped them to "Rum Row", a watery boundary line situated twelve miles off the US coast and thus out of its jurisdiction. Here, the rumrunners weighed anchor and waited for the bootleggers' boats.

## TEQUILA

---

Tequila is a distilled spirit made from the cooked and fermented juice of the agave, a native plant to Mexico. Despite it's spiky appearance the agave is not a cactus. Traditionally the process is labour intensive and artisanal and delightfully many tequila distilleries still operate this way. A Blue agave plant usually takes 8 years to mature and it has only one life to give.

## MEZCAL

---

Many may know tequila better, but mezcal came first. In fact all tequila is mezcal, but not all mezcal is tequila.

Mezcal like its cousin tequila, is made from agave, but not necessary blue agave and it usually come from Oaxaca. Mezcal distillers traditionally slow-roast the agave by burying it in pits with hot rocks, which infuses the final product with its signature smokiness.

## COGNAC

---

Cognac is widely considered to be the ultimate luxury beverage today but its humble beginnings can be traced back to ancient times

The warming, amber elixir is produced in the legally regulated Cognac region on the central Eastern coast of France, just north of Bordeaux.

## ARMAGNAC

The difference between Cognac and Armagnac ? Imagine a length of velvet and another one of a silk fabric. Stroke them. The Velvet has a Deep, rich texture.

This is an Armagnac. The silk is pure finesse, and that, to me, is a Cognac
